# Research questions

1. How do the experiences of displacement and access to **durable solutions** among IDPs in Iraq change over time?
2. What are the needs, coping strategies and aspirations of IDPs, and which events or factors are perceived to impact these needs, coping strategies, and aspirations over time?
3. How does the experience of IDPs in Iraq inform our conceptualization and operationalization of quasi-durable and durable solutions?

# IASC Framework on Durable Solutions

**IASC FRAMEWORK  
ON DURABLE  
SOLUTIONS  
FOR INTERNALLY  
DISPLACED  
PERSONS**

*“A durable solution is achieved when internally displaced persons no longer have any specific assistance and protection needs that are linked to their displacement and can enjoy their human rights without discrimination on account of their displacement.”*

Durable solutions can be in terms of their **return** to their place of origin, **integration** in their current place of residence, or **resettlement** elsewhere.

*A **rights-based process** to support DS should be organized around the principles of **choice, access and participation***

United Nations A/HRC/13/21/Add.4

Agenda item 3  
Promotion and protection of all human rights, civil, political, economic, social and cultural rights, including the right to development

**Report of the Representative of the Secretary-General on the human rights of internally displaced persons, Walter Kälin**

Addendum

**Framework on Durable Solutions for Internally Displaced Persons\***

*Summary*

The Guiding Principles on Internal Displacement (E/CN.4/1998/53/Add.2, annex) stipulate in principle 6 that “displacement shall last no longer than required by the circumstances”. Drawing on existing international law, the right of internally displaced persons to a durable solution is articulated in principles 28–30.

The Framework on Durable Solutions for Internally Displaced Persons set out in this report is organized around four questions.

Question 1. What is a durable solution for internally displaced persons?

The specific needs and human rights concerns of internally displaced persons (IDPs) do not automatically disappear when a conflict or natural disaster ends. Nor do they fade away when people initially find safety from ongoing conflict or disaster. Rather, the displaced — whether they return to their homes, settle elsewhere in the country or try to integrate locally — usually face continuing problems, requiring support until they achieve a durable solution to their displacement.

A durable solution is achieved when internally displaced persons no longer have any specific assistance and protection needs that are linked to their displacement and can enjoy their human rights without discrimination on account of their displacement. It can be

\* Late submission.

# IASC Framework on Durable Solutions

What criteria determine to what extent a durable solution has been achieved?

1. Long-term safety & security
2. Adequate standard of living
3. Access to livelihoods and employment
4. Effective & accessible mechanisms to restore housing, land & property
5. Access to personal & other documentation
6. Family reunification
7. Participation in public affairs
8. Access to effective remedies & justice

:: Experienced without discrimination ::

# Research Design and Methodology

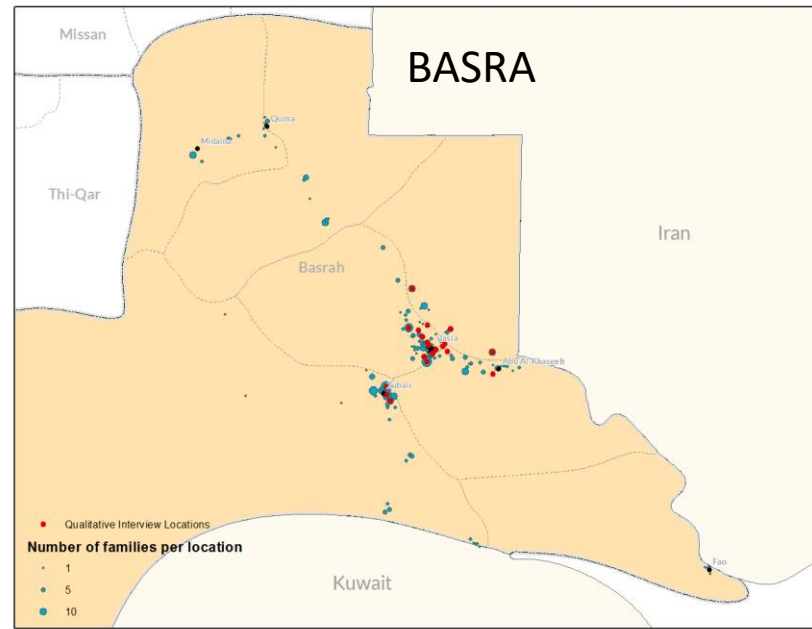

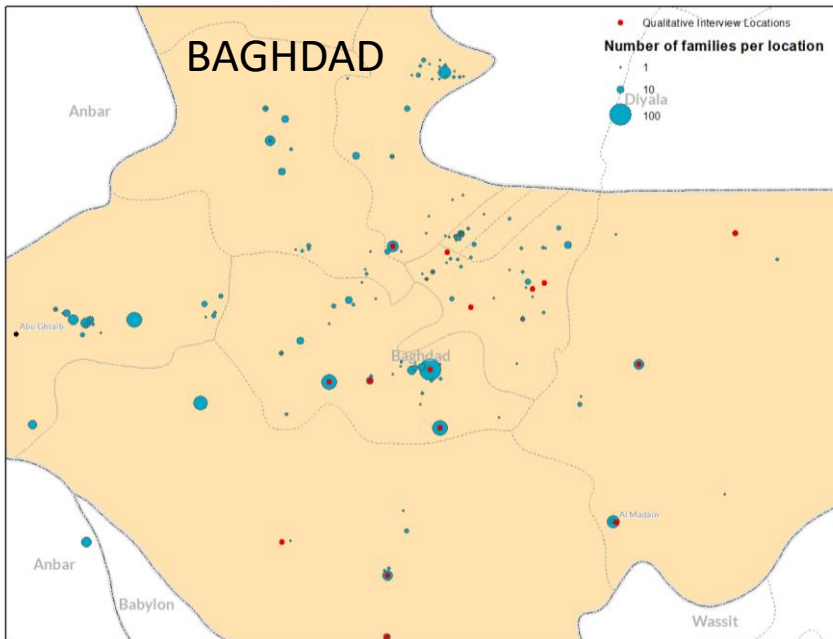

- Mixed methods and longitudinal design: 3 rounds over 1.5 years
- Quantitative structured questionnaire to a 4,000 Households in 4 governorates
- Qualitative interviews with 80 IDPs, 80 host community members per round
- Family tracking: TEXTIT, and monthly compensation of 10,000 IQD per family
- Data collection teams involved in question generation and data analysis

# Sample in Round 1 and Round 2

| GOVERNORATE OF DISPLACEMENT | NUMBER OF INTERVIEWS (ROUND 1, APRIL 2016) | NUMBER OF INTERVIEWS (ROUND 2, DECEMBER 2016) | NUMBERS WHO CHANGED DISTRICT/ GOVERNORATE BETWEEN ROUNDS | NUMBERS WHO RETURNED HOME BETWEEN ROUNDS | NUMBERS WHO REMAINED IN SAME GOVERNORATE | NUMBERS WHOM SURVEY WAS UNABLE TO CONTACT |
|-----------------------------|--|---|--|--|--|---|
| BAGHDAD                     | 1054                                       | 1021  | 10   | 67                                       | 944                                      | 33  |

# General description of the sample

Timeline of displacement

| GOVERNORATE  | PERCENT ARAB | PERCENT KURD | PERCENT TURKMEN | OTHER |
|--------------|--------------|--------------|-----------------|-------|
| BAGHDAD      | 96.8         | 1.2          | 1.9             | 0.1   |
| BASRAH       | 81.2         | 1.5          | 13.7            | 3.6   |
| KIRKUK       | 92.9         | 1.9          | 3.7             | 1.5   |
| SULAYMANIYAH | 89.7         | 7.1          | 1.6             | 1.6   |

Did you flee before or after ISIS arrived / problem started?

Age Pyramid of all Iraqi IDPs in survey

# Findings and Conclusions related to the 8 Durable Solutions

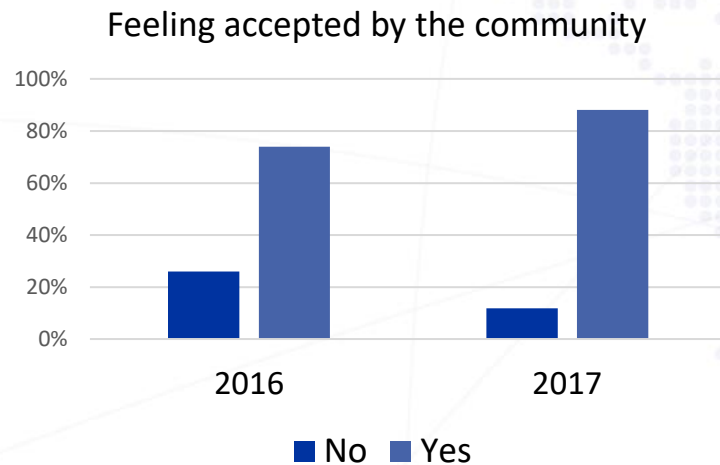

1. Long-term safety & security
2. Adequate standard of living
3. Access to livelihoods and employment
4. Effective & accessible mechanisms to restore housing, land & property
5. Access to personal & other documentation
6. Family reunification
7. Participation in public affairs
8. Access to effective remedies & justice

# 1. Long term safety & security

IDPs feel safer in their current place of residence than in the areas where they were living before they had to flee.

This sense of safety increases with length of displacement and is tied to feeling more accepted by the community.

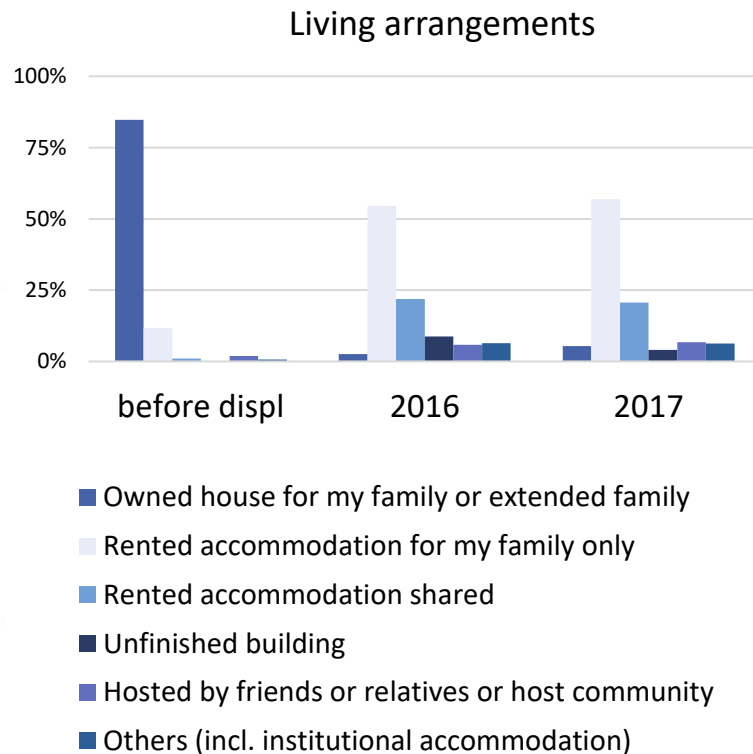

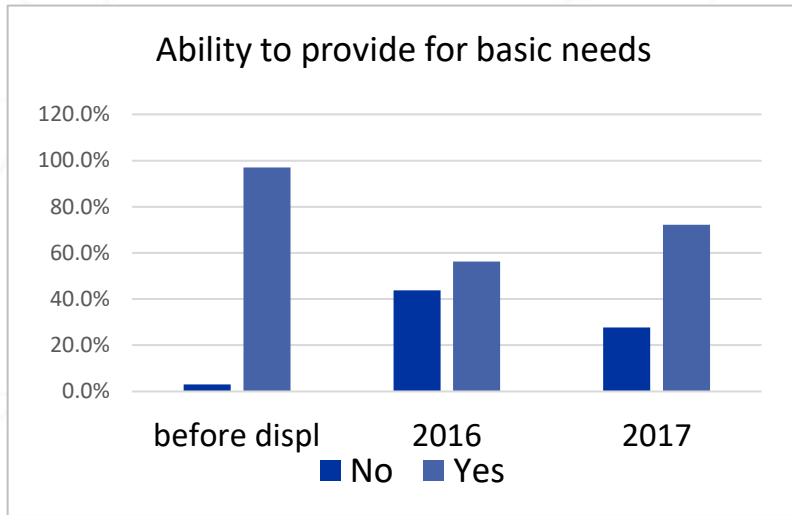

## 2. Standard of Living

### IDPs experience

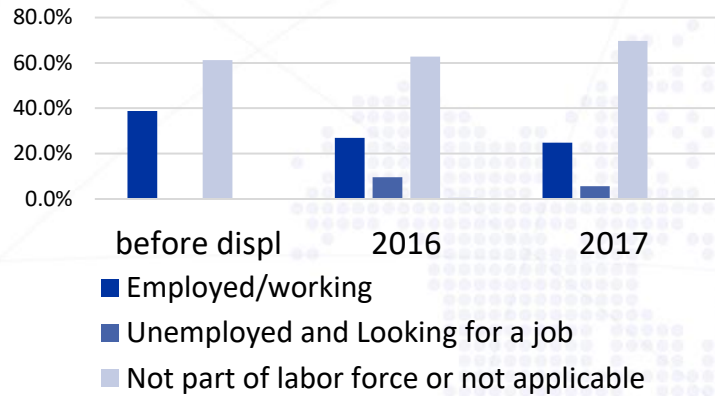

- a considerable decline in their standard of living
- decreased ability to provide for basic needs decreased sharply right after displacement.

Basic needs provision and housing situations improve with time.

# 3. Livelihood

Employment

Primary sources of income

- Growing pool of “discouraged workers” (from 60 to 70%)
- People working in daily labour as primary income source nearly doubled from 18% before displacement to 43% after displacement (no change in 2017).
- Agriculture: 24% of families before displacement obtained their primary income from agriculture. In 2017, this was only 1% of families.
- Government employee salaries/transfers

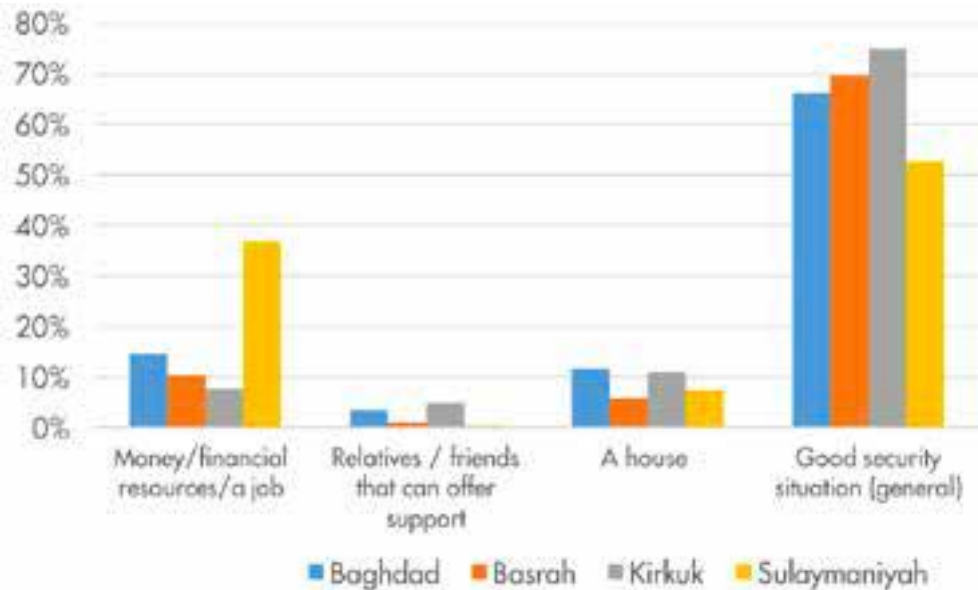

## 4. Effective & accessible mechanisms to restore housing, land, & property

The vast majority of IDPs (96% in 2016) were unable to access their place of residences as of 2014, citing “active fighting” and “community tensions” as the primary obstacles.

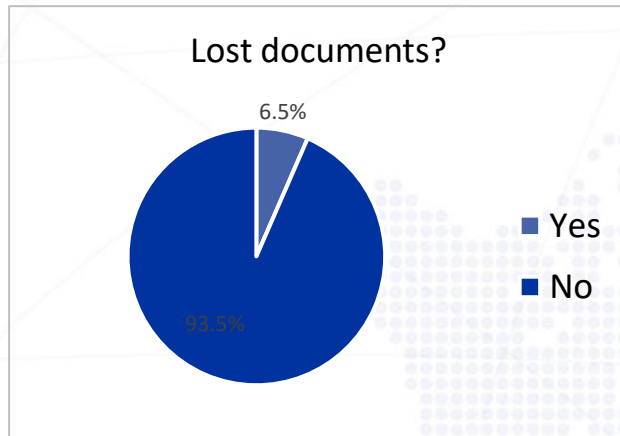

Documentation of property ownership

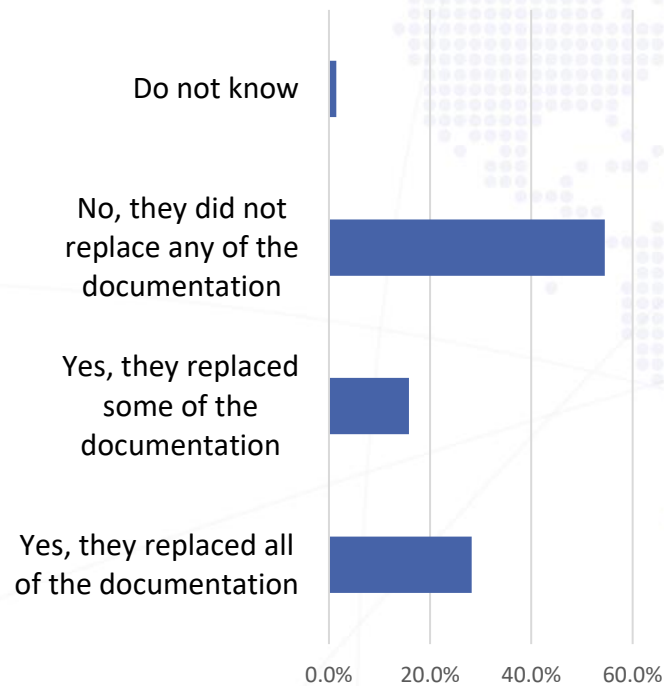

Most important factors for return

## 5. Access to personal & other documentation AND 6. Family reunification

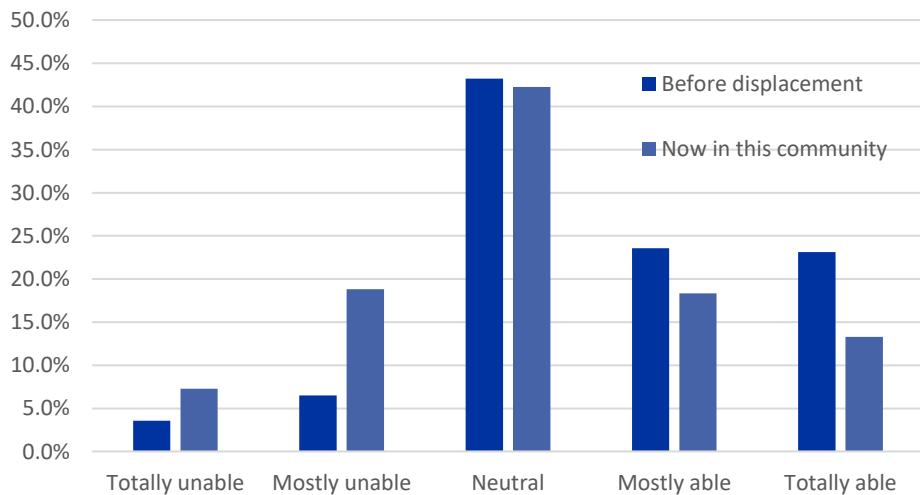

Replacing lost documents:

Unlike other IDP situations, loss of documentation and separation of family members seems not to be a significant problem among IDP populations in these governorates.

# 7. Participation in public affairs

Do you feel that you and your family have the power to make important decisions that can change the course of your life?

Very low rates of participation in public affairs suggests substantial lack of IDP involvement in community decisions and their absence from consultative processes.

## 8. Access to effective remedies and justice

Seeking justice as:

- As Individual/family
- As member of local community
- As member of ethnic/religious group

IDPs believe in the need for justice, especially to create the desired security and safety; however, great variations exist in what justice means, and how it should be pursued.

Justice is a key condition for...

# Main Conclusions from Findings

- Since 2014, displacement in Iraq:
  - is an urban phenomenon.
  - is an effective protection strategy
- Neither loss of documentation nor family separation seems to be a significant problem among IDP study participants
- In 2017, by less than 2% of remaining IDP families argue that IDPs as a group are strongly or very strongly discriminated against.
- Registration with the MoMD has been successful, with 94% registered.
- Safety and security is most important factor in IDPs' willingness to return, followed by housing and livelihoods.
- Safety and security is also most likely to keep people where they live now.
- Borrowing from family and friends is the most widespread strategy to cope with the decline in living standards. But this puts a huge burden on the family.
- IDP participation in governance and community life is very low, and thus challenges aid programming, political participation, and the growth of civil society.
